BRAAS COMPANY FLORIDA NEWSLETTER

GAST MANUFACTURING & JUN-AIR

Braas Company is proud to announce that we have added Gast Manufacturing and Jun-Air to our Florida product offering.

GAST MANUFACTURING, INC. designs and manufactures quality air-moving products - vacuum pumps, compressors, air motors, gear motors, vacuum generators, regenerative blowers and Smart Air technology - to meet the many challenging applications of OEMs and end-users worldwide. www.gastmfg.com

JUN-AIR also offers a large line of air compressor products, specializing in clean quiet, point of use compressors. JUN-AIR compressors have a unique design and are updated with the latest technology, making them suitable for use in an increasing number of applications e.g.: dental clinics, laboratories, dispense systems, graphics, health care, door opening devices, and fitness equipment.

www.jun-air.com

For questions on either of these quality products, contact your Braas fluid power specialist or our office at 1.800.282.8124.

“Anyone who ever needed a machine and didn’t buy it, paid for it, but never got it.”

Henry Ford

BRAAS COMPANY WELCOMES TOL-O-MATIC TO OUR LINEAR MOTION PRODUCT OFFERING.

Tolomatic has over 50 years of experience in the automation marketplace. Tolomatic’s expertise include rodless linear motion, servo driver high thrust actuators, right angle gear drives, brakes and clutches. Tol-O-Matic builds very rugged actuator products and typically ships each item within 5 days or less (for catalog items). Tolomatic has a great offering of ballscrew, leadscrew, belt and roller screw actuators for wide range of applications. 2D and 3D models can be configured online. Customers can also download a motion sizing application online as well (or call your Braas employee-owner to do the sizing for you).

BRAAS FLORIDA TEAM ADDITIONS

IN THE LAST FEW MONTHS, BRAAS HAS BEEN FORTUNATE TO ADD THREE GREAT NEW RESOURCES FOR OUR CUSTOMERS IN FLORIDA!

Todd Bost – Robotics and Motion Control Specialist (East Coast)

Todd joined Braas Company in the summer of 2006 as a motion control/vision specialist. Todd has extensive experience in motion control, linear motion technology, servo applications and machine controls. Todd also has a strong pneumatics background that round out his abilities as a resource for our customers. Todd will be covering the east coast of Florida from Jacksonville to Miami. Todd works out of Orlando, and can be reached at **407-304-2514**.

George Barfield – Robotics and Motion Control Specialist (West Coast)

George recently came on board with the Braas company, and will be sharing the motion control/vision specialist role with Todd Bost. George is based out of Pinellas County and will be covering the west coast of Florida from Naples to Brooksville. George has been in systems integration for over 15 years and has extensive robotics and machine control experience. George can be reached at **813-352-3864**.

Amar Seudath - Inside Technical Customer Service

Our latest addition to the Braas Company team is Amar Seudath. Amar will be working in inside sales as our fluid power technical resource. Amar has several years of fluid power experience working as a technical trainer, product specialist, and outside salesman. Amar will be based in our Oldsmar office, and handling inside sales for the west coast of Florida. You may also talk to Amar on application questions regarding any of our fluid power products. Amar is fluid power certified, and has many years experience with the extensive SMC product line.

SMC NEWS

Have you looked at the extensive catalogs of SMC, covering thousands of parts? SMC employs over 2000 engineers and as a company releases 1-2 new products every week. Who could possibly keep up with the all of the new products and find the right component for an application? This is one of the primary reasons that Braas Company was added by SMC Corporation as a Technology distributor in the state of Florida. By assembling the Braas team, with extensive pneumatic and SMC specific background knowledge, and backing this up with over \$4.5m in inventory with next day availability, we are the team that can meet that challenge. Give us a call and our sales and/or application engineers are ready to assist you on your pneumatic needs. We look forward to serving the Florida market with SMC's vast product offering. To order literature from Braas Company, visit us at www.braasco.com/contact_index.html and select "Literature Request."

BRAAS FLORIDA'S 6-AXIS ROBOT CELL

Have you ever been promised a "solution" to your automation problems . . . only to be disappointed and left with a bunch of automation components that didn't work together properly? It happens more than you may think. At Braas Company, we take a different approach. We create an environment designed to give our customers confidence when choosing automation technology. We invite prospective 6-axis robot users to visit our Oldsmar location to experience and learn about leading edge automation technology before they buy. This cell has been developed for pre-sale proof-of-concept, time trials, program development, machine simulation and ROI calculations. If you are considering robots for your application, please be sure to hear what the Braas Company Florida location has to offer your company.
