HARPER COLLEGE STUDENTS APPLY TECHNOLOGY

Braas Company recently donated pneumatic cylinders and valves to Harper College and the components are being put to good use. At the conclusion of one of the technology classes, students show off their ability to apply what they have learned. Using pneumatic valves, cylinders, conveyors, sensors, and PLC's the students were given the task of designing and building a "machine" to drill, convey, and sort parts of varying sizes. Harper College is dedicated to preparing students for "real world" types of employment.

"To be able under all circumstances to practice five things constitutes perfect virtue; these five things are gravity, generosity of soul, sincerity, earnestness and kindness." - Confucius

RITTAL XPRESS

RITTAL X PRESS

As the world's leading enclosure manufacturer, Rittal combines durability, aesthetics, carefully crafted functionality and exceptional value to create the cabinets that power the industry. Regardless of your enclosure requirements, Rittal has the flexibility and know-how to deliver the products you need. The versatility of Rittal's line of wallmount enclosures is unparalleled in the industrial marketplace.

Rittal Xpress, what is it and what does it mean for our customers? Standard wallmount carbon steel and stainless boxes are not in stock in a wide range of sizes. Rittal has long been recognized as a manufacturer of high quality electrical enclosures. Being a German manufacturer for many years, the product has evolved and been Americanized (hinge location, closure, paint color). Today the wallmount enclosures as they are called manufactured in Urbana, Ohio, in Rittal's 620,000 square foot state-of-the-art manufacturing facility. For information on this new line of stand enclosures or any Rittal needs, contact your Braas Company sales rep at 847.760.6630 or 877.942.7227.
